Feutersoey, November 2020

Information regarding the monopoly abolition as of 1 January 2021

Dear client

The chimney sweeper monopoly in the Canton of Bern will be abolished as of 1 January 2021. In addition, the uniform tariffs will be annulled. For owners, tenants and administrators this means more freedom but also more responsibility.

What does this mean? The property owner will be in charge of guaranteeing that the required maintenance of the heating system is carried out. The GVB commands an interval of the cleaning check, depending on the type of the heating.

Given that the communities of Lauenen, Gsteig and Saanen are not affected by this monopoly abolition, we will carry on the combustion control on behalf of the local entities.

As a local company with the licence of the GVB, we would like to continue to carry out the required maintenance services for a fair price. **Without your counter report, we will, as previously done, get in touch with you in order to make an appointment for the next cleaning.** Upon request, we will gladly prepare a maintenance and service agreement.

May you and your loved ones stay healthy and happy.

Yours,

Chimney Sweepers Rolf von Siebenthal GmbH

Rolf von Siebenthal and team
